## **CLAIMS**

1. A positive working imageable element comprising:

a substrate;

a first layer disposed on a portion of the substrate comprising a polymeric material; and

a second layer disposed on the first comprising a hydroxyl group-containing polymer that includes a heat-labile moiety represented by the formula:

$$R_1 - C - O - \cdots$$
,  $R_1 - NH - C - O - \cdots$ , or  $R_1 - O - C - O - \cdots$ 

wherein  $R_1$  is an alkyl group, an arylalkyl group, an aryl group, an alkenyl group or a silyl group.

- 2. The element of claim 1, wherein the substrate comprises aluminum.
- 3. The element of claim 1, wherein the substrate comprises grained aluminum, anodized aluminum, or grained and anodized aluminum.
- 4. The element of claim 1, wherein the first layer comprises a copolymer including units of N-phenylmaleimide, methacrylic acid or methacrylamide.
- 5. The element of claim 1, wherein the first layer comprises a copolymer including units of N-phenylmaleimide, methacrylamide, acrylonitrile, and a moiety represented by the formula:

or

$$\begin{array}{c|c} & R_5 \\ -C & C \\ \hline & C \\ \hline & C \\ -NH \\ \hline \end{array}$$

or units of both moieties;

and wherein  $R_4$  is OH, COOH, or  $SO_2NH_2$ , and  $R_5$  is hydrogen, halogen or a  $C_1$ - $C_{12}$  alkyl group.

6. The element of claim 1, wherein the first layer comprises a first copolymer including units of N-phenylmaleimide, methacrylamide and methacrylic acid, and a second copolymer including units of N-phenylmaleimide, methacrylamide, acrylonitrile and a moiety represented by the formula:

or

$$-CH_{2}$$
 $-CH_{2}$ 
 $-CH_$ 

or units of both moieties,

and wherein  $R_4$  is OH, COOH, or  $SO_2NH_2$ , and  $R_5$  is hydrogen, halogen or a  $C_1$ - $C_{12}$  alkyl group.

7. The element of claim 1, wherein the first layer comprises a resin having activated methylol or activated alkylated methylol groups.

- 8. The element of claim 7, wherein the resin comprises a resole resin.
- 9. The element of claim 1, wherein the first layer comprises a radiation absorbing compound.
- 10. The element of claim 9, wherein the radiation absorbing compound is an infrared radiation absorbing material.
- 11. The element of claim 10, wherein the infrared radiation absorbing compound is a dye or a pigment.
- 12. The element of claim 1, wherein the second layer comprises a radiation absorbing compound.
- 13. The element of claim 1, wherein the hydroxyl group-containing polymer is a phenolic resin or a copolymer or derivative thereof.
- 14. The element of claim 1, wherein the hydroxyl group-containing polymer is a novolak resin.
- 15. The element of claim 1, wherein the heat-labile moiety comprises a pendant group on the hydroxyl group-containing polymer.
- 16. The element of claim 1, wherein  $R_1$  comprises:

- 17. The element of claim 1, wherein  $R_1$  is  $C(CH_3)_3$ .
- 18. The element of claim 1, wherein the hydroxyl group-containing polymer comprises units of:

or

$$\begin{array}{c|c} & CH_3 \\ \hline CH_2 & CH \\ \hline CH_2 & CH_2 \\ \hline CH_2 & CH_2 \\ \hline CH_2 & CH_2 \\ \hline CH_3 & CH_3 \\ \hline CH_3 & CH_3 \\ \end{array}$$

- 19. The element of claim 1, wherein the hydroxyl group-containing polymer includes 5 mol% to 50 mol% of the heat-labile moiety.
- 20. The element of claim 1, wherein the hydroxyl group-containing polymer includes 10 mol% to 30 mol% of the heat-labile moiety.

- 21. The element of claim 1, wherein the imageable element comprises a printing plate precursor, an electronic part precursor or a mask precursor.
- 22. A method of forming a printing plate precursor comprising: providing a substrate;

applying onto the substrate a first layer comprising a polymeric material and a radiation absorbing compound; and

applying onto the first layer a second layer that comprises a hydroxyl groupcontaining polymer that includes a heat-labile moiety having the formula:

$$R_1$$
—C-O---,  $R_1$ —NH—C-O---, or  $R_1$ —O-C-O---  $\parallel$   $\parallel$   $0$  O

wherein  $R_1$  is an alkyl group, an arylalkyl group, an aryl group, an alkenyl group or a silyl group.

23. The method of claim 22, further comprising:

imagewise exposing the precursor to radiation such that exposed portions of the second layer are more developable in an alkaline developer liquid than unexposed portions; and

developing the precursor to form an image.

24. A positive working imageable element comprising:

a substrate;

a first layer disposed on a portion of the substrate comprising a polymeric material and a radiation absorbing compound; and

a second layer disposed on the first layer that is substantially free of the radiation absorbing compound and comprising a hydroxyl group-containing polymer that includes a heat-labile moiety represented by the formula:

$$R_1-C-O---$$
,  $R_1-NH-C-O---$ , or  $R_1-O-C-O-- \parallel$   $0$   $0$ 

wherein  $R_1$  is an alkyl group, an arylalkyl group, an aryl group, an alkenyl group or a silyl group.
